BACK-END WEB DEVELOPMENT: Express, Ruby on Rails, PostgreSQL, MongoDB, NodeJS

PROJECTS

Bridge Bridge is a full stack shipping logistics utility application. It allows users with intensive shipping requirements keep all of their information in one place, track their shipping packages, and receive live updates to their computers or phones. It is a school final project I built with my peers. I was responsible for the packages interface and integrating the Twilio API.	Sept. 2021 - Sept. 2021
